

How to Start Investing in Fractional Shares

1. Choose a trusted investment app that supports fractional shares (e.g., Robinhood, Public, Fidelity).
2. Create your account and verify your identity.
3. Deposit a small amount - even \$5 is enough to get started.
4. Browse and select stocks or ETFs you'd like to invest in.
5. Decide how much to invest (no need to buy a full share).
6. Set up recurring investments (optional but powerful).
7. Track your performance and adjust monthly.
